

ABSTRACT OF THE DISCLOSURE

A device for securing and conveniently holding an electronic device, such as a cell phone, in a golf cart includes a holster adapted to removably receive a clip of the electronic device. Preferably, the holster includes upper and lower apertures adapted to receive a portion of an alligator clip of the electronic device therethrough, as well as an open-ended slot on the face thereof which is adapted to receive a swivel on the electronic device therein. An anchor is attached to the holster and is adapted to be inserted into a golf ball holding compartment of the golf cart for securely supporting the device and electronic apparatus relative to the golf ball holding compartment. Typically, the anchor is a semi-spherical cradle configured to hold a golf ball therein, which together frictionally hold the device within the golf ball holding compartment of the golf cart.
